SURVEY METHODOLOGY

ANNENBERG CONSTITUTION DAY CIVICS SURVEY METHODOLOGY

The Annenberg Constitution Day Civics survey was conducted for the Annenberg Public Policy Center via telephone (CATI) by SSRS, an independent research company. Interviews were conducted from July 14-July 18, 2016 (where noted) among 1,021 U.S. adults, aged 18 and older, drawn from a national probability sample in all 50 states, and from August 11-August 15, 2016 (where noted) among 1,475 U.S. adults, aged 18 and older, drawn from a national probability sample in all 50 states. In the July survey, the dual frame sample, included 620 cell phone respondents and 33 respondents who completed the survey in Spanish. In the August survey, the dual frame sample, included 913 cell phone respondents and 55 respondents who completed the survey in Spanish. Data were weighted to represent the target U.S. adult population. The adjusted margin of error for total respondents in the July sample is +/- 3.64 % at the 95% confidence level and +/-3.63 for the August sample. The response rate was 7% for the July sample and 9% for the August sample (AAPOR RR 3).

For more detail on the methodology, including sampling, within household respondent selection, weighting variables and procedures, please visit SSRS Omnibus.
