\*\*\*p<.001 Controlling for Education, Race, Age, Gender, Ethnicity, Income, Following Zika in media, and Political Ideology

\*\*p<.01 Controlling for Education, Race, Age, Gender, Ethnicity, Income, Following Zika in media, and Political Ideology

(Asked of respondents who have done something to protect themselves from getting Zika in the past three months)<sup>1</sup>

ZG-54a. What types of things have you done to protect yourself from getting Zika, in the past three months? (Open-end/Unaided: Do not Read and Accept Multiple Responses)

	<b>BASE: Those who said they've done something to protect against Zika in past 3 months % (n=183)</b>
Wore long-sleeved shirts or other protective clothing outdoors	9
Replaced or repaired window screens	4
Removed standing water from outside your home/Removed standing water once a week	18
Used mosquito netting	1
Avoid activities or areas that would bring you in contact with mosquitoes	22
Purchased insect repellent	28
Worn insect repellent	33
Used condoms/Made sure your partner uses condoms	2
Thrown out any items that hold water like vases and flower pot saucers— Inside your home	5
Emptied, turned over or covered any items that hold water like vases and flower pot saucers-- Inside your home	6
Killed mosquitoes inside your home	4
Treated areas where mosquitoes rest inside your home with insect spray or fogger	10
Other	13
Don't know	2
Refused	--

<sup>1</sup> Percentages add to more than 100 percent because multiple responses were accepted.

## **ANNENBERG SCIENCE KNOWLEDGE SURVEY METHODOLOGY**

The Annenberg Science Knowledge (ASK) survey was conducted for the Annenberg Public Policy Center via telephone (CATI) by SSRS, an independent research company. Interviews were conducted from May 19, 2016 through May 23, 2016 among 1,018 U.S. adults, aged 18 and older, drawn from a national probability sample in all 50 states. The dual frame sample, included 613 cell phone respondents and 41 respondents who completed the survey in Spanish. Data were weighted to represent the target U.S. adult population. The adjusted margin of error for total respondents is +/- 3.6 % at the 95% confidence level. The response rate was 6% (AAPOR RR 3).

For more detail on the methodology, including sampling, within household respondent selection, weighting variables and procedures, please visit [SSRS Omnibus](#).
