[^2]
## Methodology

The study was conducted for the Annenberg Public Policy Center of the University of Pennsylvania via web (97\%) and telephone ( $3 \%$ ) by SSRS, an independent research company over three separate waves among a nationally representative probability sample drawn from SSRS's Opinion Panel on March 30, 2021. The same panelists were contacted for interviews in each wave. In this most recent wave, 1,669 out of 1,941 panelists completed the survey from August 16-September 5, 2021. The web total respondents were $\mathbf{1 , 6 1 8}$ and there were 51 telephone respondents. 1,635 interviews were conducted in English and 34 in Spanish. Data were weighted to represent the target U.S. adult population. The margin of sampling error for total respondents is $+/-\mathbf{3 . 2}$ percentage points at the $95 \%$ confidence level. The design effect is $\mathbf{1 . 8 3}$ More information about SSRS can be obtained by visiting www.ssrs.com

Additional Notes: Because percentages are rounded, they may not total $100 \%$ overall and NET percentages may not exactly match sum of corresponding percentages.
Throughout this topline the abbreviation "DK/REF" stands for a NET of those who answered "Don't know" or refused to answer via telephone and those who skipped the question (i.e "Web Blank") in the web survey. The abbreviation "REF" stands for a NET of those who refused to answer via telephone and those who skipped the question in the web survey.
An asterisk (*) within the tables indicates less than 0.5\%.

[^0]:    ${ }^{1}$ For each category listed, respondents were classified as "Heavy users" if they answered 4 or 5 on 0 to 5 scale asking how much information they get from that source. 0 means they get "No information" from the source, and 5 means they get "A lot of information" from the source. Respondents could use any number between 0 and 5 . For the Conservative media, respondents answered a 4 or 5 when asked how much information they get from sources such as Fox News, Mark Levin, or Breitbart News. For the Very conservative media category, respondents answered 4 or 5 when asked how much information they get from sources like Newsmax, OAN, Parler, Gateway Pundit, or Telegram. For the Broadcast-Newspaper Mainstream combined category, respondents answered a 4 or 5 when asked from Broadcast sources like ABC News, NBC News, or CBS News, or newspaper sources like the Associated Press or the news pages of the New York Times or the Wall Street Journal. For the Social Media category, respondents answered a 4 or 5 when asked how much information they got from sources such as Facebook, Twitter, or Instagram.
    ${ }^{2}$ Fox News conservative: report getting information about the most important issues of the day from sources like Fox News "all the time" or "often." Very conservative: report getting information about the most important issues of the day from sources like Newsmax, OAN, Parler, Gateway Pundit, Telegram "all the time" or "often." Broadcast-Newspaper mainstream: report getting information about the most important issues of the day from sources like ABC News, NBC News, CBS News, the Associated Press, the news pages of the New York Times, the Washington Post, or the Wall Street Journal "all the time" or "often." Users of Social Media such as Facebook, Instagram, or Twitter "all the time" or "often."

[^1]:    ${ }^{3}$ Due to multiple responses, results may add up to greater than $100 \%$.

[^2]:    ${ }^{44}$ For each category listed, respondents were classified as "Heavy users" if they answered 4 or 5 on 0 to 5 scale asking how much information they get from that source. 0 means they get "No information" from the source, and 5 means they get "A lot of information" from the source. Respondents could use any number between 0 and 5 . For the Conservative media, respondents answered a 4 or 5 when asked how much information they get from sources such as Fox News, Mark Levin, or Breitbart News. For the Very conservative media category, respondents answered 4 or 5 when asked how much information they get from sources like Newsmax, OAN, Parler, Gateway Pundit, Telegram. For the Broadcast-Newspaper Mainstream combined category, respondents answered a 4 or 5 when asked from Broadcast sources like ABC News, NBC News, CBS News, or newspaper sources like the Associated Press, the news pages of the New York Times or the Wall Street Journal. The Users of Social Media such as Facebook, Instagram, category, respondents answered a 4 or 5 when asked how much information they got from sources such as Facebook, Twitter, or Instagram.
